

ELISA Kits on Sale

Enzyme-Linked Immunosorbent Assay (ELISA) is a popular analytic tool to detect and quantify the presence of proteins or small molecules including cytokines, chemokines, growth factors and hormones(see below). ABSbio offers accurate, fully validated, ready-to-use ELISA Kits for convenient and sensitive quantitation of a wide range of targets in various sample types. Each kit typically includes pre-coated plates with capture/detection antibodies, standards, HRP conjugate, diluent & wash buffers, and accessory reagents. Our stringent manufacturing and quality control standards allow us to offer the highest levels of performance and consistency with each ELISA kit you run.

Cell Based ELISA

ABS-Bio™ Phospho-Akt (Ser473) Detection Kit A (CEF010-Akt)

ABS-Bio™ Phospho-Akt (Ser473) Detection Kit B (CEC010-Akt)

Sandwich ELISA

ABS-Bio™ Mouse/Rat Insulin (SE010-insulin)

ABS-Bio™ Human IgG Fc ELISA Kit (SE018-HUFC)

ABS-Bio™ DYKDDDDK (flag) tag ELISA Kit (SE003-FLAG)

ABS-Bio™ DYKDDDDK (flag) tag ELISA Kit (SE002-flag)

ELISA Kits for Chemokines, Cytokines & Growth factors

ELISA Kits for Hormones

ELISA Kits for Livestock & Poultry

Promo sale (20% off) ELISA kits for new U.S. customer only.
